Introduction

The **McHale F5400-F5400C** which you have purchased has been developed through years of constant research and development. Given proper care and attention the **F5400-F5400C** will give years of reliable and dependable performance. However it is important that the operators manual is read and fully understood to achieve this, **before** the machine is operated. As part of this philosophy it is vital to use only **genuine McHale** replacement parts, as these are manufactured to the same high standard as the original machine. These may be obtained through your **McHale** dealer.

If any part of this manual is not fully understood, please contact your **McHale** dealer who will be able to answer any questions or queries that you might have. It is important to quote the machine serial number when requiring spare parts or technical assistance. Space is provided below to record the machine details:

Serial number:	
Year of manufacture:	
Date of delivery:	

If you require further copies of this spare parts manual please
quote part number CLT00487

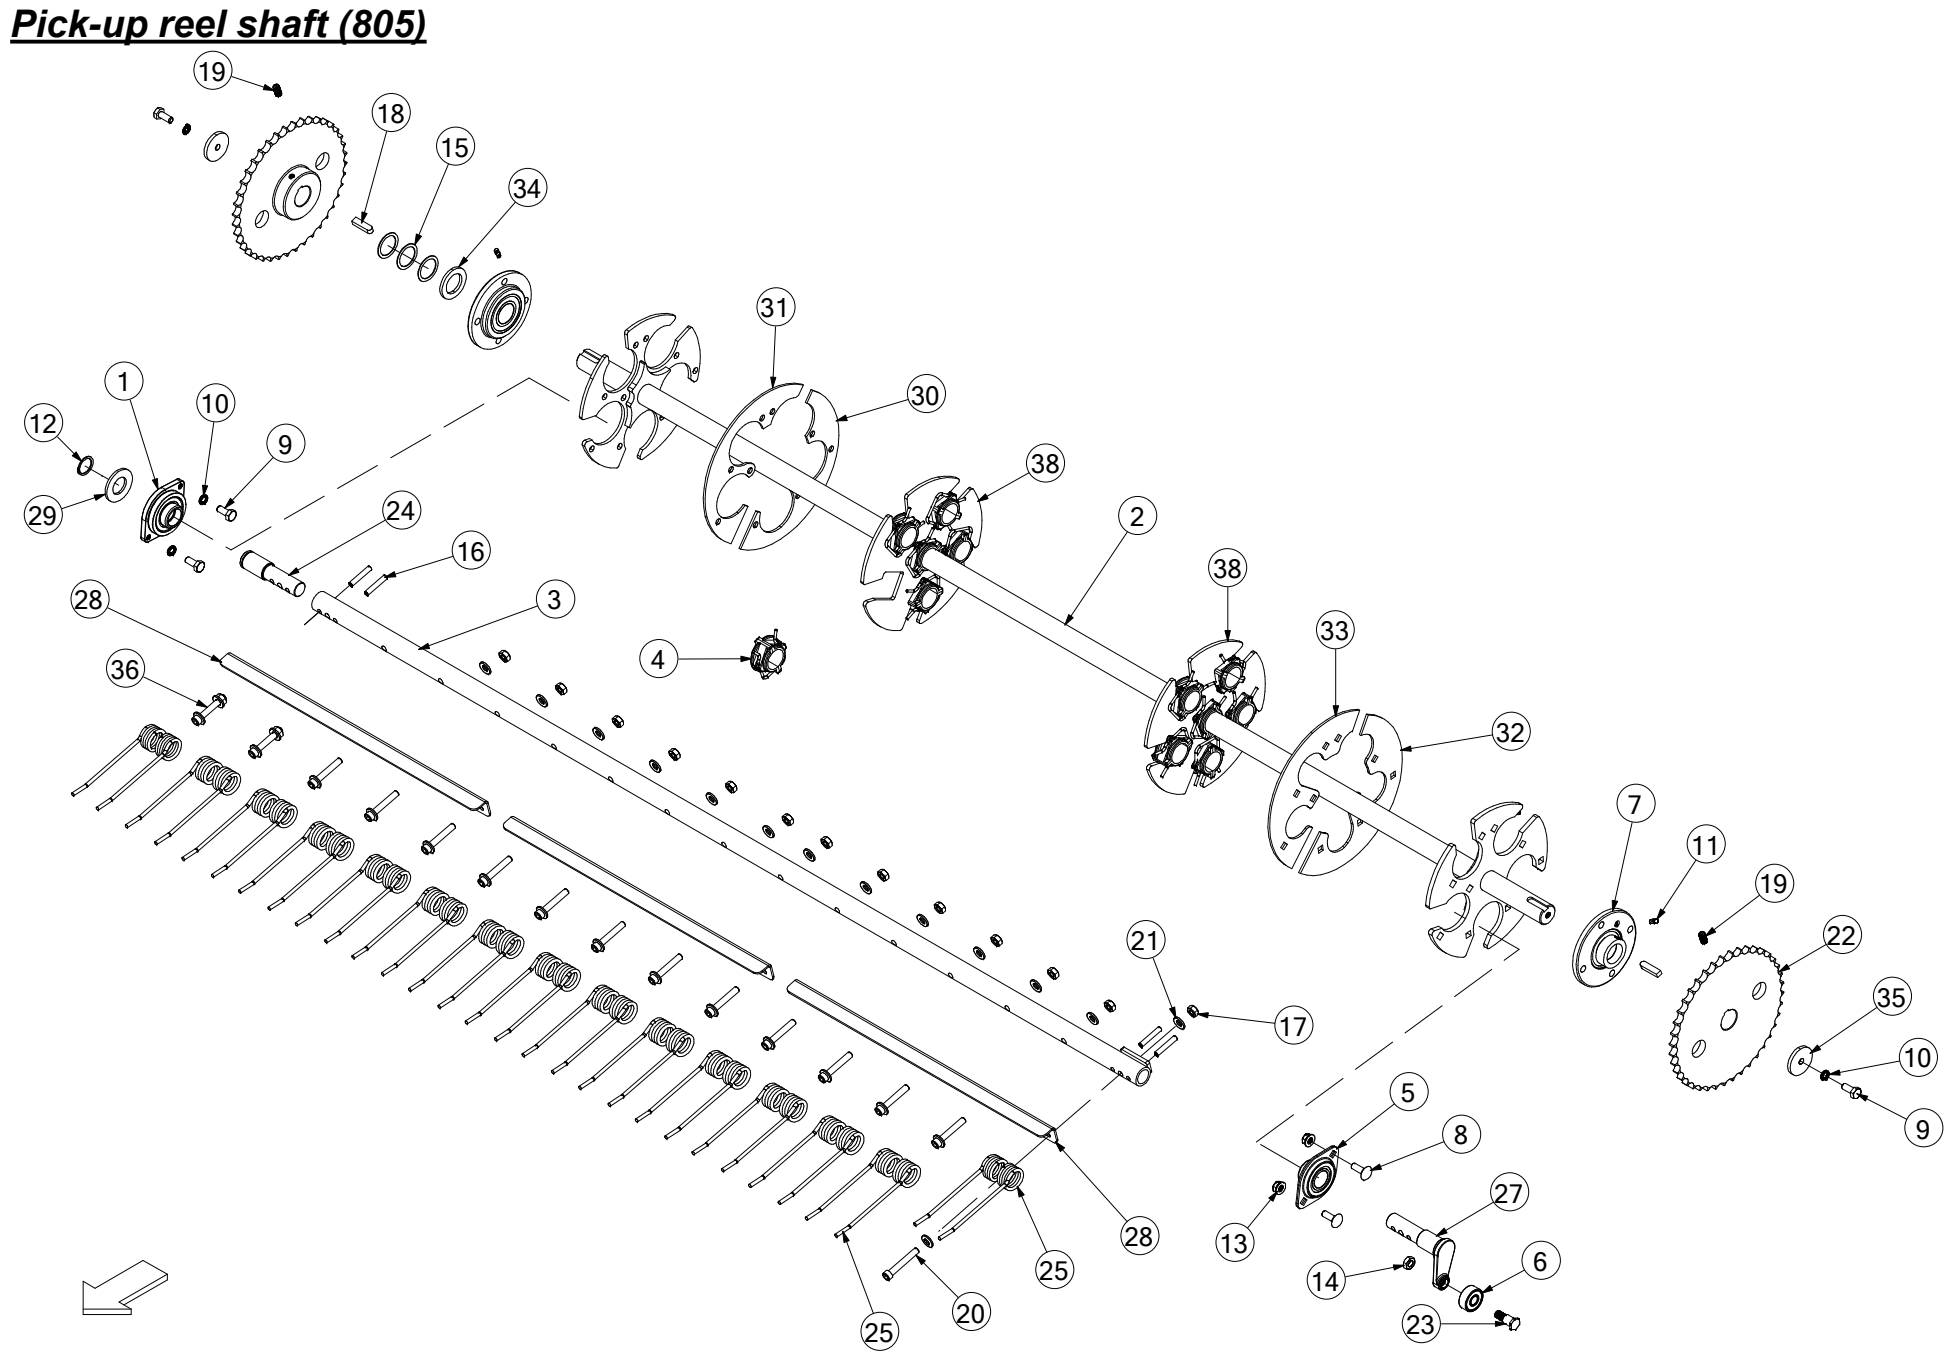

Note: Parts described as left and right are done so according to the direction that the machine normally travels in.

Note: Due to a policy of continuous product development and improvement *McHale Engineering* reserve the right to alter machine specifications without prior notice.

This exploded view diagram illustrates the assembly of a mechanical device, likely a pump or a similar fluid-handling component. The parts are numbered 1 through 63. The diagram shows the following components and their assembly relationships:

- Base and Housing (1-10):** The main body of the device, including a base plate (1), a housing (2), and a cover (3). It features a large circular opening (4) and a smaller one (5). A long, thin component (6) is shown being inserted into the base.
- Internal Components (11-20):** A series of internal parts, including a long shaft (11), a series of small components (12-15), and a large, curved component (16). A long, thin component (17) is shown being inserted into the shaft.
- Drive and Control (21-30):** A series of components including a long, thin component (21), a series of small components (22-25), and a large, curved component (26). A long, thin component (27) is shown being inserted into the shaft.
- Assembly and Fasteners (31-63):** A series of components including a long, thin component (31), a series of small components (32-35), and a large, curved component (36). A long, thin component (37) is shown being inserted into the shaft. A long, thin component (38) is shown being inserted into the shaft. A long, thin component (39) is shown being inserted into the shaft. A long, thin component (40) is shown being inserted into the shaft. A long, thin component (41) is shown being inserted into the shaft. A long, thin component (42) is shown being inserted into the shaft. A long, thin component (43) is shown being inserted into the shaft. A long, thin component (44) is shown being inserted into the shaft. A long, thin component (45) is shown being inserted into the shaft. A long, thin component (46) is shown being inserted into the shaft. A long, thin component (47) is shown being inserted into the shaft. A long, thin component (48) is shown being inserted into the shaft. A long, thin component (49) is shown being inserted into the shaft. A long, thin component (50) is shown being inserted into the shaft. A long, thin component (51) is shown being inserted into the shaft. A long, thin component (52) is shown being inserted into the shaft. A long, thin component (53) is shown being inserted into the shaft. A long, thin component (54) is shown being inserted into the shaft. A long, thin component (55) is shown being inserted into the shaft. A long, thin component (56) is shown being inserted into the shaft. A long, thin component (57) is shown being inserted into the shaft. A long, thin component (58) is shown being inserted into the shaft. A long, thin component (59) is shown being inserted into the shaft. A long, thin component (60) is shown being inserted into the shaft. A long, thin component (61) is shown being inserted into the shaft. A long, thin component (62) is shown being inserted into the shaft. A long, thin component (63) is shown being inserted into the shaft.

The diagram uses dashed lines to indicate the assembly path and the relative positions of the components. A small arrow in the bottom left corner points towards the assembly direction.

Decals 1 (755)

Keep clear of the machine while working.

(CST00014)

Keep hands clear of rotating rollers.

(CST00017)

Keep hands out of crush area.

(CST00019)

Check wheel nuts daily.

(CST00020)

Lifting-eye/ lift-hook location.

(CST00032)

Grease daily.

(CST00060)

Do not dismantle.
High pressure always.

(CST00056)

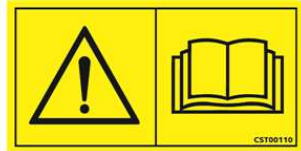

Do not stand on the platform when machine is moving or working.

(CST00107)

Keep clear of pickup area with machine/engine running.

(CST00108)

Read instruction manual before use.

(CST00110)

Avoid hydraulic fluid escaping under pressure.

(CST00111)

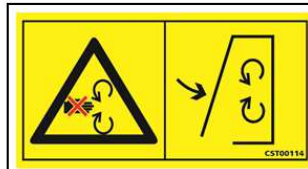

Remove key from tractor before performing maintenance.

(CST00113)

-----	---------	-------------	-----

Decals 2 (756)

Close protective covers before operating the machine.

(CST00114)

Slowly release hydraulic pressure before carrying out maintenance.

(CST00115)

Ensure tyre pressure is at 1.38 BAR (20 P.S.I.).

(CST00119)

Keep hands out of crush area between roller & chassis rail.

(CST00120)

Maximum hydraulic pressure & PTO speed.

(CST00121)

General Warnings!

(CST00134)

Ensure that bystanders are outside the “**danger zone**” before operating tailgate.

(CST00140)

To avoid injury stay clear of the “**danger zone**” while machine is operating.

(CST00141)

Never adjust or reach into the netter unless the PTO has been disengaged and tractor shut down.

(CST00142)

Stay clear of rotating PTO shaft. Entanglement in rotating drive line can cause serious injury or death.

(CST00143)

Crush Hazard. Keep hands clear of rotating elements.

(CST00144)

Decals 3 (757)

Disconnect the power supply and turn off the tractor if welding or working on the electrical system.

(CST00145)

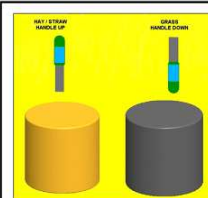

To avoid injury stay clear of tailgate while it is being raised and lowered.

(CST00146)

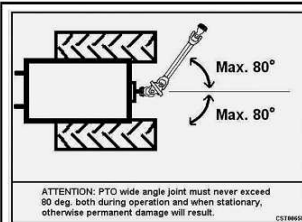

The control lever operating the pick-up reel should be in the 'float' position.

(CST00609)

Handle UP when baling hay or straw.
Handle DOWN when baling silage or grass.

(CST00656)

The PTO wide angle joint must never exceed 80°, or permanent damage may result.

(CST00658)

McHale logo

(CST00710)

DIRECTION OF WHEEL ROTATION

Wheel direction.

(CST00711)

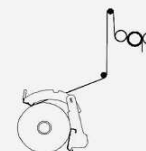

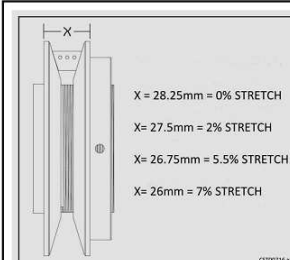

Diagram of net path through feeding rollers.

(CST00713)

Variable pulley settings to adjust the tension of the net.

(CST00716)

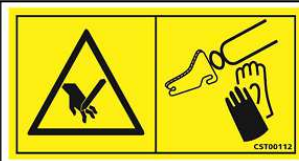

Always lock the tailgate in place before working on the open bale chamber.
