Introduction

The **McHale F560** round baler which you have purchased has been developed through years of constant research and development. Given proper care and attention the **F560** will give years of reliable and dependable performance. However it is important that the operators manual is read and fully understood to achieve this, **before** the machine is operated. As part of this philosophy it is vital to use only **genuine McHale** replacement parts, as these are manufactured to the same high standard as the original machine. These may be obtained through your **McHale** dealer.

If any part of this manual is not fully understood please contact your **McHale** dealer who will be able to answer any questions or queries that you may have. It is important to quote the machine serial number when requiring spare parts or technical assistance. Space is provided below to record the machine details:

Serial number:	
Year of manufacture:	
Date of delivery:	

If you require further copies of this spare parts manual
please quote part number CLT00065.

Note: Due to a policy of continuous product development and improvement, *McHale Engineering Ltd.* reserve the right to alter machine specifications without prior notice.
